

## **Coal Seam Gas mining could be coming to our neighborhood !**

Come to the talk by author Sharyn Munro about Coal Seam Gas exploration and the impacts nationwide.

CSG is potentially the biggest environmental and social issue facing our region.

Come along and get informed, and bring someone along else that needs convincing that this type of mining is bad all round.

### **Saturday at Inverloch Hub, 12noon.**

Are you aware that they are considering granting a license for Coal Seam Gas exploration between Walkervile and Cape Paterson.

We only have till Tuesday left to object.

Friends of the Earth have sample letter of objection and the details of who to send it.

The Bass Coast Shire Council is anti Coal Seam Gas. Let's help South Gippsland Shire Council call for a Moratorium against Coal Seam Gas Exploration.

Councilor David Lewis, has announced that he and another Cr, are drafting a motion, calling for a moratorium on CSG Exploration until CSG is proven to be safe, and also calling for all chemicals used in fracing to be disclosed.

The Bass Coast Shire Council has decided not to support Coal Seam Gas. Let's help.

For the motion to be approved a majority vote by the SGS Councilors will be needed.

Please show your support by attending the SGSC briefing sessions, to be held at the Leongatha Council offices on the [20th June at 2pm](#) and or [7pm](#).

People wishing to make statements in support of the motion, can do so by calling the council and booking a short time slot. [\(03\) 5662 9200](tel:0356629200)

**Please also contact & lobby the Councilor directly, to let them know of your support for a Moratorium on CSG.**
